● ABOUT ME

Software engineer with 9 years in production (Python, Go, TypeScript). At OpenVPN I design and ship security and AI-agent features for a cloud-delivered secure-networking platform (per-customer certificate authority, device identity, access control), including LangGraph agents on Vertex AI with tool calling, human-in-the-loop approvals and simple retrieval (RAG).

Previously, as Technical Lead for Cognigy's Live Agent and AI Copilot, I built and scaled enterprise software for high-volume contact centres such as Lufthansa's.

I take features from prototype to production: clear specifications, security designed in rather than bolted on, and quality that is measured rather than assumed.

● WORK EXPERIENCE

TECHNICAL LEAD ENGINEER – OPENVPN – 10/2025 – Current – REMOTE, SPAIN

- Built AI agent features, now in customer beta, with LangGraph on Vertex AI: system prompts, tool calling against customer infrastructure, human-in-the-loop approvals, flow guardrails and simple retrieval (RAG) over product knowledge.
- Designed the agent tool surface on the Model Context Protocol (MCP), with human-in-the-loop confirmation bound to the tool, its arguments, the tenant and the user.
- Security architecture: a per-customer certificate authority issuing device and gateway certificates, with its private keys encrypted using Cloud KMS; per-device identity, OAuth2/OIDC with PKCE, WAF and load-balancer edge perimeter, fail-closed ingress, least-privilege service identity and secrets management.
- Designed the VPN gateway and network architecture across OpenVPN and WireGuard: multi-gateway topologies with GeolIP election, automatic failover and per-tenant isolation.
- Built load testing with purpose-built Go tunnel simulators and k6, reaching 100,000 simultaneous connections to emulate live traffic before release.
- Own QA and DevOps engineering alongside hands-on delivery, including managing two senior DevOps engineers: CI traceability, tiered test suites and release gates for production launch.

TECHNICAL LEAD ENGINEER – COGNIGY.AI – 09/2021 – 09/2025 – REMOTE, SPAIN

- Technical lead for Live Agent and AI Copilot, which processed messages and call transcripts to give contact-centre agents real-time sentiment and response guidance; mentored a team of 7 engineers.
- Scaled the platform for enterprise workloads, adapting infrastructure and code for Lufthansa's contact centre to handle 13k+ daily conversations at the bot-to-human handover; removed backend bottlenecks and introduced database read replicas.
- Owned incident management for enterprise customers on the premium support line: on-call triage, root-cause analysis and post-incident hardening.
- Designed multi-cloud Kubernetes infrastructure (Helm, FluxCD) and observability (Prometheus, Grafana, Kibana, Sentry), and led CI/CD with GitHub Actions and Azure DevOps.

SENIOR SOFTWARE DEVELOPER – WILLIAM HILL – 02/2020 – 08/2021 – GIBRALTAR, UNITED KINGDOM

- Built sportsbook microservices with TypeScript/Node.js, Kafka, AWS Lambda and DynamoDB on Kubernetes; owned testing and GitLab CI releases and served on the out-of-hours on-call team.

SENIOR SOFTWARE DEVELOPER – ADDISON GLOBAL LTD – 06/2019 – 02/2020 – GIBRALTAR, UNITED KINGDOM

- Built the Moplay casino web app (React, TypeScript), increasing casino usage by 20%, launched the Moplay React Native app, and designed a Detox testing framework that made testing over 50% faster.

SENIOR SOFTWARE DEVELOPER – CIKLUM WORKING FOR ADDISON GLOBAL LTD. – 12/2017 – 05/2019 – MÁLAGA, SPAIN

- Outsourced front-end developer for Addison Global who grew into a full-stack role (AWS, Jenkins CI/CD) and moved to the client's headquarters team.

● **EDUCATION AND TRAINING**

08/2015 – 07/2018 Málaga, Spain
SOFTWARE ENGINEERING COURSEWORK (DEGREE NOT COMPLETED) Universidad de Málaga

- C, C ++, Java, Haskell, assembler, concurrency, systems programming
- SQL databases, data structures, algorithms
- Mathematical logic, statistics, calculus and algebra
- Fundamentals of business

● **LANGUAGE SKILLS**

Mother tongue(s): **SPANISH**
Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

● **JOB-RELATED SKILLS**

Technical skills

- AI and security: LangGraph, Vertex AI, MCP, simple RAG, human-in-the-loop guardrails; X.509 PKI, Cloud KMS, OAuth2/OIDC, device identity, least privilege, fail-closed design; VPN protocols (OpenVPN, WireGuard).
- Languages: Python (FastAPI), Go, TypeScript/JavaScript (Node.js, React), SQL and NoSQL (PostgreSQL, MongoDB, Firestore).
- Cloud, infrastructure and testing: GCP (Cloud Run, KMS, Cloud Armor, load balancing), AWS, Kubernetes, Docker, CI/CD (GitHub Actions, Azure DevOps), observability (Prometheus, Grafana, Sentry), load testing with k6 and Go simulators, Playwright.
